

MERSEN CONFIGURABLE PANELS

Mersen's Configurable Panels meet code requirements for a variety of applications

Mersen offers panels that are stocked or configured, quoted and built to your specification utilizing its Product Configuration and Selection Tool. Whether you want a Fused Coordination Panelboard to help you achieve code compliance and protect critical power operations, a Fusible Shunt Trip Switch for protecting the electrical systems that are integral to safe elevator operation, or a panel that is specific to your needs, Mersen specialists and engineers can work with you to design a solution that fits your requirements.

Fusible Shunt Trip Disconnect and Multi-Unit Fusible Shunt Trip Panel: Mersen offers over 90,000 configurable options of single unit shunt trip switches, which allows for optimal functionality to be built into a single compact panel.

Fused Coordination Panelboard: Designed to meet requirements defined by the National Electrical Code (NEC) to protect critical power operations.
